The weight per yard shall not exceed 500 pounds.

Commercial Composting Services

Commercial composting services are available to Beaverton businesses using 1- to 8-yard containers and generating food scraps at the subscription quantity (restaurants, grocery stores, food processors, institutions, and companies with food service.)

- Collected materials are limited to food scraps and non-food items as described in the Administrative Rules for Solid Waste and Recycling.
- Contaminated loads will be collected at the standard garbage rate.
- In order to ensure that program efficiency is both cost-effective and efficient for collection routes, services may be limited to businesses generating larger quantities of food scraps.
- Food scrap collection may be available only at the onetime per week collection level. Haulers are not required to provide more frequent service until collection volume and routes enable multiple collection days.

Commercial composting customers who use a compactor or drop box for waste collection will be charged the following rates for commercial food waste collection.

Commercial Composting Rates (For Compactor and drop box customers):
